Safe Locks | Enigma

 36 Users*  Audit Trail  Time delay / Time Lock

The Associated Enigma Digital Safe lock offers a wide range of functions to suit the needs of medium to high security applications

Features:

- **GPS/GSM Tracker**
Instant location and lock history provided through real-time GPS tracking
Enables tracking in the event of the theft of your safe
Next to real-time monitoring of the position of the safe
- **Mobile App + OTC**
Enables 2 step verification
Ability to issue one-time access code with ease through the mobile app, simply login to the app & insert the 4-digit pin and the app will generate the OTC
- **Networked**
Enables remote programming and reporting
Secure standalone 4G network allows for next to real-time monitoring of the safes use
- **Silent Duress Alarm**
Instant notification sent through to the ARC when duress code is activated
- **Seismic Monitoring**
Installation of a Seismic device monitored by our Enigma system
Instant alert sent to the ARC from the monitored seismic device in the event of an attack.
