

Entrance Control | Speed Gates

Speed Gates, often also called Speed Lanes, provide a reliable and efficient access solution at the forefront of your premises, ensuring entrance to the building can be controlled in both a secure and systematic manner all whilst maintaining and complementing the surrounding aesthetics!

Our range of speed gates are state-of-the-art glass security barriers, constructed with the latest multi-beam infrared technology to deter tailgaters and detect unauthorised access events. The Fastlane range of pedestrian entrance control products, which incorporates optical turnstiles, speed gates, barrier arm turnstiles, entrance gates and tailgate detection devices; has been designed to balance the needs of aesthetics, security, ease of use and flow rates demanded by today's modern entrance environment.

Designed for high pedestrian accessed areas, our Speedgates have the capability to process up to 60 people per minute.

Our UK Manufactured Speed Gates can be integrated with all known access control systems, connecting this innovative access solution with your existing security measures to further prevent unauthorised access from being gained.

With installation from our in-house team of DBS certified engineers based throughout the UK in addition to full servicing capabilities through our maintenance packages and our expertly-rated reactive maintenance capabilities, opting for your speed gate solutions through Associated Security provides the full solution!

We are also able to provide bespoke speed gate solutions tailored to your individual access requirements to ensure that your premises is completely optimised for ease of authorised access, whilst preventing entry to unauthorised personnel.
