

PRODUCT GUIDE

**ASSOCIATED
SECURITY**

**YOUR
SECURITY
IN SAFE
HANDS**

Our company history extends back to 1945 when we began trading as J.S. Sproston in Manchester. John Stanley Sproston became a well trusted local locksmith establishing a loyal customer base in the area which soon grew to include government bodies, banks and commercial customers. Due to the continued growth, John's nephew, Roy Turner Sr came aboard in 1952. 1979 then saw Roy's two sons Stephen and Roy join the business to continue with the business development, giving John the opportunity to retire. Stephen and Roy remain active directors to this day.

Working with independent and major customers, we still keep our family values at the heart of our business & with over 75 years' experience, you can be confident; **YOUR SECURITY IS IN SAFE HANDS.**

We offer our professional security services 24 hours a day, 7 days a week throughout the entirety of the UK for our clients, ensuring that security requirements are fulfilled with efficiency and expertise. We use our own fully trained Master locksmiths, and expert access control and safe engineers to complete all jobs, and with engineers in strategically placed locations throughout the UK & Ireland, we can ensure industry-leading response times. We are proud to have one of the highest first-time fix rates in the industry and we continuously surpass our set service level agreement targets.

Our extensive product range covers all of the security requirements of our customers, both domestic and commercial, and our staff go above and beyond to provide excellent customer service, assuring all requirements are met, all queries answered and all of our customers and their needs are completely satisfied.

INDUSTRY STANDARDS

INDUSTRY STANDARDS, MADE SIMPLE

Everyone has different needs for a safe and picking one that suits your requirements can be a daunting task, here at Associated Security with our team of experts, you can rest assured that we will guide you through the whole process, assisting with the initial selection right through to offering our installation services, helping you to make security a part of your everyday life.

Before choosing the right safe, the first question you need to ask is: What am I protecting? Cash, Valuables or Data? Once you have determined the primary use of your safe, it's then time to take a look at your options.

Cash & Valuables ratings simply state the amount of cash and/or valuables that can be stored in your safe and the amount of cover an insurer would offer (always check with your insurance provider before purchase).

Valuables cover for safes is always 10x the Cash Rating provided, so if your safe is offering a £6,000 Cash Rating, this means the safe will have a £60,000 Valuables Rating.

If you wish to combine both cash and valuables within your safe, you can work this out by deducting the amount of cash you wish to store from the cash rating, and then multiply the remainder by 10 to give you the remaining total left for valuable cover.

Our range of Graded Safes are independently tested & certified to ensure the cash and valuables cover stated in production is accurately provided.

Please see the below table to familiarise yourself with the safe grades and how they relate to cash and valuables ratings.

Grade	Cash Rating	Valuable Cover
0	£6,000	£60,000
1	£10,000	£100,000
2	£17,500	£175,000
3	£35,000	£350,000
4	£60,000	£600,000
5	£100,000	£1,000,000
6	£150,000	£1,500,000

DOCUMENTS, DATA & DIGITAL MEDIA

Fire ratings reflect the amount of time any paper documents or digital media would be protected in the event of a fire. The longer period in minutes, the greater the fire resistance offered. Always look for fire ratings that provide information relating to independent testing and certificated - if it doesn't say "tested and certified" you may be purchasing an inferior product.

There are different options for fire protection, some safes cover paper documents, some protect digital media, such as USBs/memory sticks, external hard drives & other digital devices, and data protection covers internal hard drives, video & audio tapes and cellulose based materials like film & negatives, so it's important to ensure your safe is providing the appropriate fire protection for your storage requirements.

90 minutes
120 minutes

AIS APPROVED SAFES

The AIS stands for the Association of Insurance Surveyors, a well-known and highly respected body of individual risk control and reduction experts working in the insurance sector throughout the UK.

An insurance approved safe certified by the AIS, provides greater reassurance when purchasing a safe as you are guaranteed a safe that is up to the required standard and compliant with your insurance requirements.

SAFES

THE ASSOCIATED RANGE
UK MANUFACTURED
EUROGRADE SAFES

Our UK manufactured Cash Safes offer the ideal secure storage solution for the protection of cash and valuables across both Domestic Security and Commercial Security requirements.

Our range of Eurograded safes have been designed to surpass the stringent requirements of European Safe testing as outlined in LPS 1183 Issue 4, and the European standards for safes EN 1143-1:2015. The safes are tested and certified by LPCB and manufactured under the control of ISO9001:2015, using the latest technology and production techniques.

VALIDATOR DEPOSIT SAFES

Our smart cash deposit safes incorporate cutting-edge technology, ensuring efficient and accurate management of large volumes of cash. By streamlining the cash-handling process, the Validator Safe helps you mitigate costs and minimize risks associated with traditional cash-handling machines.

Validator Pro Safe Your Ultimate Smart Safe Solution for Unmatched Security & Efficiency

The Validator Pro is the ultimate smart safe for your business. This state-of-the-art safe meets the highest security standards (VdS Class 3 to 6) and offers our largest storage capacity. It can hold up to 4,200 banknotes and accept them in single or bunch mode. It can also dispense notes for payouts, making your cash management easier and faster. You can also monitor all your transactions and operations online via the Validator Portal. And you can adjust it to your needs with an optional float safe of different sizes. The Validator Pro is the smart safe that exceeds your expectations

Validator Smart Bag Deposit Safe Enhance Bag Security & Tracking

Our UK manufactured Associated Capsule Deposit Safe enables cash and small valuables to be securely deposited into a locked safe via a capsule tube located on the top of your Eurograde deposit safe. This highly efficient commercial security solution is fitted with an anti-phishing device to ensure deposited goods cannot be removed through the capsule hole.

Validator CashPay The Ultimate Cash-Handling Solution for a Safer and Simpler Business Transactions

The Validator CashPay is the ultimate cash-handling solution for your business. This device lets you accept and dispense cash without any staff intervention, reducing the risk of theft, fraud and human error. It has a secure and convenient storage capacity of up to 1000 banknotes and 1500 coins. You can access it via a tablet or integrate it into your existing POS system. And you can set it up quickly and easily with no software integration required. The CashPay is the smart way to make cash transactions safer and simpler. Order yours today and enjoy the benefits of a cashless till

Validator mini Safe Streamline Cash Delivery and Safekeeping

If you are looking for a compact and convenient smart safe, the Validator Mini is the perfect choice for you. This sleek and stylish safe has all the features of the Validator Pro, but in a smaller package that fits under any counter or desk. The printer is external, so you can place it on the desk for easy access. The Validator Mini is the ideal solution for small businesses that need a smart and secure way to manage their cash.

ASSOCIATED DEPOSIT SOLUTIONS

Our range of deposit safes are perfectly suited for a variety of commercial security needs. With secure cash deposit features including drawer trap deposits, envelope slot deposits and even air-tube deposit systems, we can fulfil your security requirements. These cash deposit solutions are available in Grades 0 to 5, fitted with fire-resistant materials and come fitted with key lock as standard with the option to upgrade to electronic or combination locks.

Drawer Trap Deposit Safe

This drawer trap deposit safe has been designed and patented in our UK manufacturing facility to suit a variety of business security requirements and offers an ideal solution for a range of commercial premises. Cash & Valuables inserted into the drawer securely drop into the locked safe below upon closing ensuring ease of use. The drawer is fitted with a locking mechanism to prevent unauthorised access.

Air Tube Deposit System

Our unique pneumatic tube system allows capsules of money to be deposited into a tube system at a collection point situated at the till. The capsule is taken through a tube system and deposited directly into a locked commercial safe. Utilising an air-tube deposit system provides peace of mind knowing staff are not going to be targeted carrying large amounts of money across shop floors - reducing the risk to staff and removing the need to close POS during cash collection.

Capsule Deposit Safe

Our UK manufactured Associated Capsule Deposit Safe enables cash and small valuables to be securely deposited into a locked safe via a capsule tube located on the top of your Eurograde deposit safe. This highly efficient commercial security solution is fitted with an anti-phishing device to ensure deposited goods cannot be removed through the capsule hole.

Envelope Slot Deposit Safe

Envelope slot deposit safes (also known as letter slot drop safes) are a quick and easy way to deposit cash, cheques or small valuables into the body of the safe. Our UK manufactured Associated Envelope slot deposit safes are fitted with anti-phishing measures to prevent attempted access through the deposit slot. The deposit can also be fitted through a wall if required.

Rotunda Deposit Safe

Our UK manufactured Rotunda Deposit Trap safe has been designed and manufactured to provide the ideal secure storage deposit safe system for a variety of commercial security requirements. With anti-phishing devices installed, this prevents any attempted access through the rotunda deposit trap. The rotunda deposit trap is situated within the interior of the safe, behind a lockable compartment to provide additional protection for deposited goods and is fitted with a lockable compartment to provide additional protection.

Rotary Deposit Safe

Our UK manufactured rotary deposit safe incorporates two separate internal lockable cupboards, offering the ideal secure storage solution for a variety of commercial security requirements. This high-security deposit safe receives deposits via the rotary at the top of the safe, allowing you to separate cash and valuables and offering ease for back-office management when cashing up.

Ironmaster Underfloor Safe

£3,500

£35,000

The Ironmaster Underfloor Safe is ideal for domestic and small business and can be upgraded to a capsule deposit for environments where items are required to be deposited on a regular basis or out of hours.

- Available in 2 sizes
- Key locking supplied as standard, electronic or combination locking upgrades available
- Capsule deposit tube upgrade available

Size	Dimensions	Weight	Volume
1	355 x 240 x 240	10	14
2	415 x 300 x 300	20	24.3

RECONDITIONED SAFES

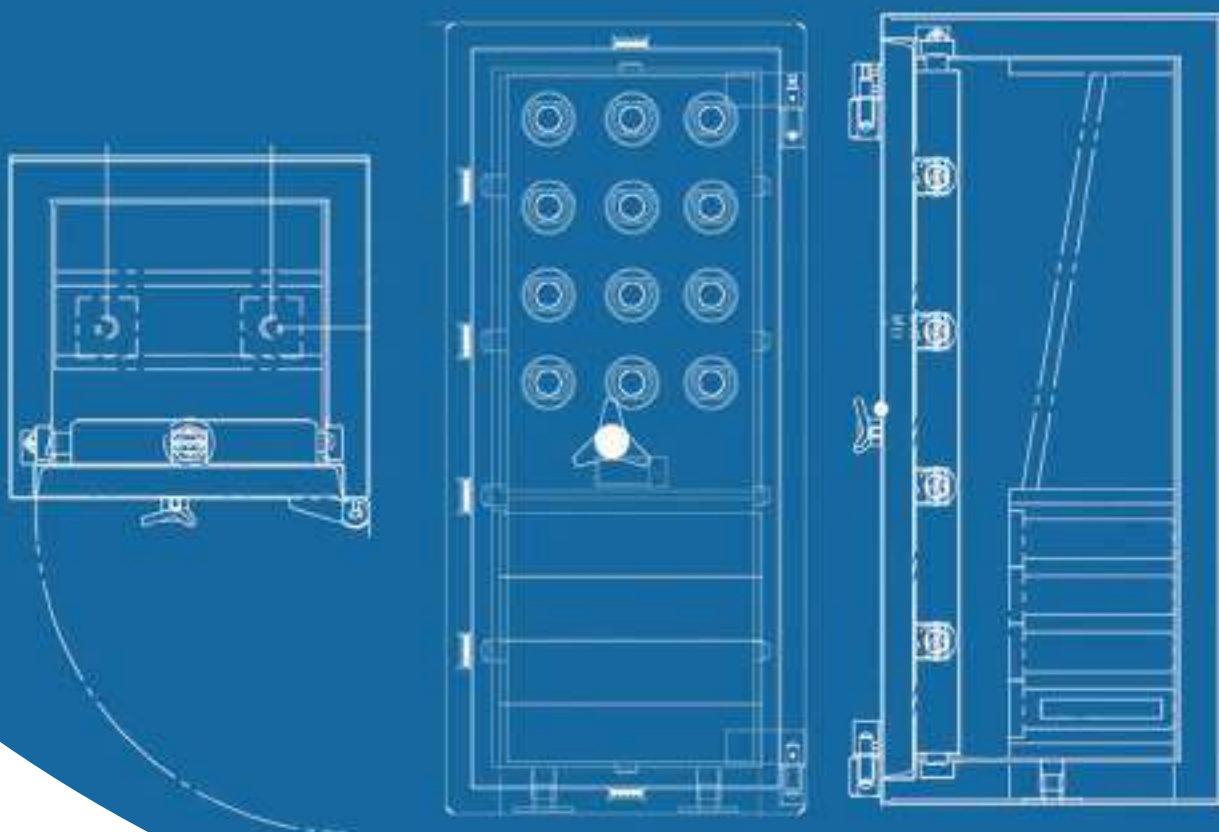

In offering Reconditioned Safes, this allows us to reduce the amount of waste produced when older safes are replaced by restoring and upgrading them to be good as new, so good that we offer a **2-year warranty** for all of our second-hand safes!

Our range of second-hand safes are refurbished to the highest standards and undergo rigorous testing to not only ensure they are in perfect working order, and are restored in accordance with the British Standards for reconditioning safes.

- Reconditioned to British & European standards for safes
- Fitted with new locking mechanisms
- Freshly sprayed to look good as new
- Full service, health and safety inspection carried out

BESPOKE SAFES

With over 75 years of experience in the manufacture of safes and secure storage cabinets taking into consideration our broad client base and the range of requirements we have fulfilled; we know that security isn't a one size fits all solution. Working with our clients on specific projects, we have provided numerous security innovations and bespoke safes to meet their individual requirements, ensuring the most efficient solutions are achieved.

Having a bespoke security solution created by our expert design & engineer team ensures that your individual home security or business security requirements are fulfilled to your exact specifications. Through our in-house design team, we're able to create detailed drawings and specifications as well as prototypes to help our customers truly envision their end product.

- Available in Grades 0-6
- Locking options include manual key lock, biometric, electronic lock or combination lock
- Additional interior storage solutions available
- Customised to your exact needs

SECURE LUXURY SAFES

Luxury Safes

At Associated Security we offer a service specifically for those who require certified and insurance approved protection for their most valued possessions. As part of the Associated group, SLS Security who specialise in the design and manufacture of completely bespoke luxury safes, we're able to provide an unrivalled service, utilising our very own UK manufacturing facilities along with our expert designers.

SLS have over 45 years' experience creating exceptional luxury safes, which we can now offer exclusively through Associated Security. When you need to purchase a safe it's important that you are choosing not only the right solution for your needs, but that it also meets all of your insurer's requirements. This is why we have a dedicated Private Client Team who are on hand to provide their expertise for every step of the process.

Handcrafted
IN GREAT BRITAIN

HIGHLY EXPERIENCED

We are one of the preferred Bespoke & Luxury Safes manufacturers within the UK, with over 45 years of experience in the hands-on construction of these solutions, in addition to our expertise of over 75 years within the industry. Alongside our standard ranges of Euro Graded Safes, we provide custom-made secure storage solutions for many of the Leading Insurance Companies, private clients and high-end businesses throughout the UK, Europe and in instances across the globe.

SECURE AND INSURED

We can assist you with all your requirements both directly, through our dedicated bespoke & luxury account management service and by liaising with your Insurance Broker/Provider to make sure the end-result meets all of their requirements to ensure that the appropriate amount of cover can be obtained for your valued assets.

HANDMADE IN BRITAIN

Not only will we provide our assistance for any decisions you are required to make regarding your safe, but we also manufacture the safe at our very own facility based in Telford. At this facility, we utilise our own teams of industrial designers, product testing and assurance teams and our highly experienced engineers to craft beautiful solutions with your security, insurance needs and even aesthetics in mind. We can provide full walkthroughs of our Manufacturing facility to our Private Clients alongside their dedicated consultant, allowing for first-hand insights and knowledge into the entire process.

DEDICATED CONSULTANTS

We pride ourselves on providing the highest levels of customer service and satisfaction, ensuring we achieve the exact needs and specifications our clients request of us. Our in-house engineers, helpdesk and, of course, dedicated consultants, are on hand to offer their assistance and expertise, so you can rest assured that your security is in safe hands with us.

CABINETS

We offer a vast range of Cabinets including our UK manufactured High-Security Storage Cabinets, AiS Approved Medicine & Controlled Drugs Cabinets and a selection of Key Cabinets which includes Bronze, Silver & Gold Rated Cabinets. These standards have been extensively developed and reflect accurate measures of strength and durability. We can also provide Bespoke made cabinets, manufactured to meet the customer's exact requirements and preferred sizes.

High-Security Storage Cabinets

Our UK manufactured High-Security Storage Cabinets are insurance approved and offer the ideal solution for a variety of business security requirements. With a variety of sizes and locking options available, our High-Security Storage Cabinets ensure that important documentation, high-valued assets and vital equipment can be securely stored with ease.

Our range of high-security storage cabinets have been designed and built to the highest standard to give you peace of mind when storing valuable items and cash.

Fitted with VdS approved safe locks and supplied with internal shelving, our high-security cabinets provide the optimal secure storage solution for the protection of company assets.

- Fitted with key locking as standard, Electronic, combination and biometric lock upgrades available
- Adjustable shelving provided
- Bespoke sizes available

Size	External*	Internal	Weight	Volume	Shelves
1	600 x 300 x 350	588 x 288 x 275	54	46	1
2	1000 x 600 x 450	988 x 588 x 345	150	217	1
3	1500 x 550 x 480	1488 x 538 x 390	170	248	2
4	1760 x 450 x 500	1748 x 438 x 419	210	322	2
5	1800 x 1000 x 400†	1788 x 988 x 310	275	574	2

Gun Cabinets

Secure storage of firearms and ammunition is a requirement by law, and our high-security gun cabinets exceed the UK standard (BS 7758) for storing firearms. Our range of Gun Cabinets are customisable with locking, shelving and internal compartment options available. We can also provide customers with ammunition safes.

Our range of Gun Cabinets, Gun Safes and Shotgun Cabinets are a secure way of keeping your firearms out of reach from unauthorised users.

- Secure storage for your firearms
- Suitable for domestic and commercial applications.
- Exceeding the UK standard for storing fire arms (BS 7758)
- Range of locking options available
- Range of sizes available
- Bespoke units made to measure

Medicine & Controlled Drugs Cabinets

Our range of Medicine and Controlled Drugs Cabinets provide a secure storage solution to meet a range of business security requirements. The range of cabinets are approved by the Association of Insurance Surveyors, meaning they are insurance approved and have been constructed to the highest standard.

Our specification and build quality exceeds that laid down by the current statutory regulations for the safe custody of controlled drugs.

- Fitted with key locking as standard, Electronic, combination and biometric lock upgrades available
- Available in 3 sizes

Dual Door Controlled Drugs Cabinets

Our insurance approved Medicines and Controlled Drugs Cabinet range includes our highly innovative Dual Door Controlled Drugs Cabinet, which combines a controlled drugs cabinet and a safe, freeing up floor space.

With AiS Approval and a combination of key locking and digital safe locking to control access, our Dual Door Controlled Drugs Cabinet provides the optimal secure storage solution for a vast array of commercial premises and industries.

- Fitted with key locking as standard, Electronic, combination and biometric lock upgrades available
- Adjustable internal shelving supplied

Double Door Controlled Drugs Cabinets

If you require a larger solution for the storage of Controlled Drugs on your premises then our UK Manufactured Double Door Controlled Drugs Cabinets provides the ideal solution. This freestanding unit is AiS Approved to provide insurance recommended protection in addition to the extensive storage ability this Double Door Controlled Drugs Cabinet offers.

The Double Door option is an ideal option for large commercial premises, with adjustable internal shelving that's provided as standard and available locking upgrades to provide a solution to meet a variety of needs.

- Fitted with key locking as standard, Electronic, combination and biometric lock upgrades available
- Adjustable internal shelving supplied

Key Cabinets

We have a wide variety of high-security key cabinets in Bronze, Silver and Gold ratings available to suit an array of differing secure storage requirements, offering our key storage cabinets in sizes to hold anywhere from 2 keys to 1000 keys, ensuring all of our clients secure key storage requirements can be catered to and that your keys are securely stored and that access can only be granted to authorised members of staff.

- Fitted with key locking as standard
- Electronic, combination and biometric lock upgrades available
- Storage from 2 keys to 1000 keys
- Wall mounted and floor standing options available

Self-Closing Key Cabinet

Our range of Self-Closing Key Cabinets is available in multiple sizes offering the ability to securely store between 25-100 keys. This high-quality key cabinet range has adjustable height hook bars to accommodate varying key sizes. The adjustable hook bars are colour coded and come complete with keytags, rings and numbers.

The Self-Closing Key Cabinets are fitted with a spring loaded 'self-closer', which combined with the Mechanical Digital Lock, allows for a true slam-shut locking operation.

- Multiple sizes available to hold between 25-100 keys
- Fitted with mechanical digital lock as standard
- Fitted with a spring loaded 'self-closer'
- Removable control index card provided

Specialist Key Cabinet

Our range of Key Cabinets extends to include bronze rated Specialist Key Cabinets with a clear perspex panel in the front to allow for quick visual check of which keys are currently out & in use without the requirement to unlock the cabinet, offering the ideal solution for use in controlled areas, such as security control offices, and allow for easy access in case of emergency as perspex can be broken if necessary.

- Multiple sizes available to hold between 24-50 keys
- Fitted with key lock as standard
- Electronic, combination and biometric lock upgrades available
- Adjustable colour coded and numbered hook bars
- Removable control index card provided

Traka 21 Key Cabinet

The Traka21 Key Cabinet allows for businesses to trace and account for every key or keyset, which are individually locked in place, to ensure that unauthorised access cannot be gained, securing the premises from potential threat.

This intelligent Key Tracking System works by authorising, securing and monitoring all of your keys, automatically controlling and recording when a key is used and by whom, helping to provide peace of mind that should unauthorised access be gained, or items were to be misplaced or go missing, the tracking system will be able to clearly show who last accessed the area.

- Stand-alone Plug & Play solution with advanced RFID technology
- Screen based audit trail and reporting capability or export via USB port
- 21 robust long-life iFobs with security seals
- 21 locking receptors with LEDs
- Manual override and door release functions in case of emergency

SAFE LOCKS

We have a wide range of VdS approved solutions available as both digital safe locks and manual safe locks in addition to an expert team of advisors who can guide you through the process to help you find the right lock for you. Why not consider replacing or upgrading your locks for one of our digital or mechanical locks today?

SAFE LOCKS

We offer a wide range of Safe Locks to accompany our high-security safes and cabinets and to provide our customers the ability to upgrade their locking mechanism to better suit their needs. From manual safe locks and digital safe locks through to biometric safe locks, we can assure you that the ideal solution for your needs is available.

VAULTS & SAFE DEPOSIT BOXES

Through our expert in-house design team, use of the latest technology and robust materials, we're able to provide Vaults & Safe Deposit Solutions for a vast array of needs, in Grades spanning from 2 – 13 EXCD, with either manual or automated deposit lockers, or even supplying & fitting everything you need for a fully operative Safe Deposit Centre, we cover the requirements of a diverse range of individuals and sectors and provide exceptional protection for valued assets against fire and burglary attacks.

VAULTS & STRONG ROOMS

Strong Rooms or Vaults are essential to clients where a higher level of security is required - be it large amounts of cash on site, high value items, controlled drugs or clients where there is a significantly high risk of theft, attack or hostage taking.

Utilising modern design and construction methods, robust materials and the expertise of our in-house technicians, our high-security Strong Rooms and Security Vaults can be custom fabricated to meet your exact requirements and supplied in Grades 2 – 13 EXCD. All Strong Rooms constructed by Associated Security are made to meet certification in accordance with the European standard EN-1143-1, offering enhanced burglary protection for your valued assets.

Associated Security's Prefabricated Strong Rooms (PSR) are constructed from wall, roof and optional floor panels which are either welded or bolted together by our in-house team of highly skilled engineers.

The panels are produced with modern production techniques, and have been constructed with a new barrier material. Our bespoke PSR's can be designed to ideally suit the requirements of the client, ensuring the constructed product accounts for the conditions at site. The PSR is assembled in a highly efficient manner and can be easily dismantled and reinstalled in a new location if necessary.

Having a Strong Room installed within your business premises provides an unparalleled level of security for your valued goods and company assets, allowing for peace of mind that the valuables within your property are appropriately secured. Assembled by our highly trained installers, our Vaults and PSRs can be expertly erected in an existing building in as little as 8 weeks.

Our Strong Room installation and Vault installation service is fully bespoke and can be adjusted to suit the requirements of your storage and spatial needs.

- All Prefabricated Strong Rooms are certified in accordance with the European standard VDS EN-1143-1
- Available in grades 2-13 EXCD
- Modern design and construction methods
- Available in a wide range of shapes and sizes
- Variety of door location options and locking options

Safe Deposit Boxes

At Associated Security we supply safe deposit lockers in a number of different sizes, the systems we supply are totally bespoke to your requirements. All of our lockers are numbered sequentially and include internal hinges which enables a 96° opening angle.

There are different height columns to suit the internal height of the room, and with the lockers manufactured totally bespoke to your needs, you can be sure the appropriate sizing is chosen. The columns are free standing, but bolted together in place, to form a full wall.

- Constructed from high quality 10mm steel
- Different locker heights available from 50mm-300mm in 25mm increments
- Manual and Automated locking options available
- Each deposit box is operated by two keys
- Various colour options available

Safe Deposit Centres

At Associated Security, we have combined our design and installation skills with our ability to supply security doors, bulk transfer units, perimeter security and access control solutions, we can provide an incomparable one-stop service solution.

Our engineers, in addition to our experienced designers, are able to complete these high-security storage projects from scratch for customers across the UK in as little as 8 weeks.

Our expert consultants guide you through the entire process, from assessing the location to adding the finishing touches. We even have our own in-house experienced installation team, who are fully trained and DBS checked to an enhanced level.

At Associated Security your security is our priority, which is why we employ dedicated, expert engineers with extensive knowledge in the industry to ensure all projects are completed to the highest standard.

- Advice on location, floor plans, layouts.
- Project and account management teams to assist throughout the entire process
- Supply, delivery, and installation of strong rooms and safe deposit lockers.
- Supply and installation of security doors, security counters/windows, and access control systems

SECURITY DOORS & WALLING

We offer a range of high-grade Security Doors and Modular Walling Solutions to provide unparalleled security measures for your premises. Ensuring the forefront of your premises, or any restricted areas within your premises are sufficiently secured from unauthorised access. We can also offer Bespoke Door Solutions to enable our customers to receive their ideal solution.

LPCB Approved Security Doors

Security Rated Doors are crucial for a number of business settings with a variety of sizes available in addition to single or double door options.

Our SR Doors are LPCB approved having fulfilled LPS 1175 standards, and are available in security ratings SR2 to SR6, providing assurance that access to your premises, such as restricted areas within your premises, by unauthorised personnel is prevented.

We provide made-to-measure solutions to tailor your Security Rated Door to meet your exact requirements, making sure it fulfils all necessary specifications and provides the optimal solution for your individual needs.

- Approved by LPCB & available from SR2 to SR6
- Available as single or double door
- Constructed with high-quality gauge steel
- Fire protection available
- Range of locking options available
- Available in either a steel or wooden finish

In instances where there may be a requirement for your Security Door to remain in keeping to its surroundings, such as for Listed Buildings, our Bespoke Security Doors provide the perfect solution to providing the appropriate security measures, whilst maintaining the needs of the premises.

Modular Security Walling

We can offer a bespoke and personally tailored light weight solution to your secure building needs. This High Security Composite Panelling System is rapidly installed and offers a significant reduction in labour costs, site down time and on-site trades due to its click in joints and pre-finished appearance which comes in a wide range of standard colours and textures.

We can take the stress and delay out of your build by offering a complimentary Security Design Package into every project, detailing secure installation methods and ensuring the interfaces between composite panelling and doors, windows, ventilation and service penetrations are inbuilt and secure. This is a demountable, lightweight and space saving system which also provides excellent fire and thermal efficiency. Walling Systems and Enclosures can be used to create new buildings, superstructures and can also be retrofit into existing buildings to security harden specifically identified areas.

We have a team of dedicated Project and Account Managers on hand, who will act as a constant single point of contact and ensure your project runs smoothly and is delivered on time.

All of our Modular Security Walling solutions are installed by our in-house team of engineers who have a wealth of experience to ensure that our clients receive an exceptional security service, completed with the utmost professionalism and efficiency.

- Demountable, lightweight and space saving system
- Provides excellent fire and thermal efficiency
- Can be used to create new buildings, superstructures or be retrofit to existing buildings
- Rapid installation by our own expert engineers

Bespoke Security Doors

Bespoke Security Doors provide the ideal security solution for high-end businesses and domestic clients looking to increase the level of security within their premises who may have specific needs or regulations that must be upheld, such as listed buildings or shared dwellings where access needs to be controlled or approved.

Our Steel Security Doors can be manufactured to meet SR2 to SR6 standards, ensuring the ideal solution is obtainable for all our customers' needs. Our Bespoke Door Service can allow for the protection against fire & heat damage, along with safeguarding against any form of attack, from both hand-held tools and electronic tools, dependent on the level of security required.

- Available from SR2 to SR6
- Fire protection available
- Range of locking options available
- Ideal for both Domestic & Commercial settings
- Also available as both timber and composite door options to PAS24

Shop Front Security Doors

Our Shop Front Security Doors offer a robust and practical solution for retail premises with a substantial foot flow. These Security Doors have been designed with heavy use in mind and are constructed from high-grade aluminium in frame widths of 50mm or 100mm, in addition to offering completely made-to-measure solutions to provide a solution that entirely fulfils your exact security needs.

We offer a variety of locking options with our Shop Front Doors, including the ability to install Access Control Solutions to provide further access protection, such as a 'Traffic Light System', providing further control of access to your premises.

In addition to the extensive range of Access Control options, and the ability for these Shop Front Security Doors to allow for automatic opening, but we also incorporate DDA access options.

- High-security aluminium door-sets
- Automatic opening available
- DDA Access available
- Multiple locking options & access control systems available
- Made-to-measure Security Door solutions

ACCESS CONTROL

Controlling access to your premises is one of the first steps you need to take in order to ensure the safety of your staff, equipment and valuables. Ensuring that unauthorised access cannot be granted to your premises, or restricted areas within your premises is essential for achieving peace of mind that your business has sufficient security measures in place, and with the wide range of high-security Access Control solutions we have available, you can rest assured that your valued assets are protected.

SPEED GATES

Speed Gates, often also called Speed Lanes, provide a reliable and efficient access solution at the forefront of your premises, ensuring entrance to the building can be controlled in both a secure and systematic manner all whilst maintaining and complementing the surrounding aesthetics.

Our range of speed gates are state-of-the-art glass security barriers, constructed with the latest multi-beam infrared technology to deter tailgaters and detect unauthorised access events.

Designed for high pedestrian accessed areas, our Speed Gates have the capability to process up to 60 people per minute.

The Fastlane range of pedestrian entrance control products, which incorporates optical turnstiles, speed gates, barrier arm turnstiles, entrance gates and tailgate detection devices; has been designed to balance the needs of aesthetics, security, ease of use and flow gates demanded by today's modern entrance environment.

- Integration with existing Access Control systems
- Range incorporates optical turnstiles, speed gates, barrier arm turnstiles, entrance gates and tailgate detection devices

Our UK Manufactured Speed Gates can be integrated with all known access control systems, connecting this innovative access solution with your existing security measures to further prevent unauthorised access from being gained.

With installation from our in-house team of DBS certified engineers based throughout the UK in addition to full servicing capabilities through our maintenance packages and our expertly-rated reactive maintenance capabilities, opting for your speed gate solutions through Associated Security provides the full solution!

We are also able to provide bespoke speed gate solutions tailored to your individual access requirements to ensure that your premises is completely optimised for ease of authorised access, whilst preventing entry to unauthorised personnel.

Electronic Access Control

Utilising electronic access control systems for security doors within your premises provides an effective solution to ensuring that only personnel with authorised access can enter. By having electronic access control systems installed within your premises, this ensures that your company assets, confidential documents and data, staff members and the overall property are protected from unauthorised personnel.

At Associated Security, we supply, install and offer maintenance on a vast array of Access Control solutions to meet the various business security requirements our clients have.

- Access gained via keypad, swipe card proximity reader, fobs or biometric systems
- Self-sufficient standalone units or computer-based systems
- Systems available with time out zones and audit trail facility

Mechanical Access Control

Ensuring that access points to your premises are secured at all times eliminates the risks posed by opportunistic thieves, and provides guarantee that only authorised personnel can gain entry.

Our high-security Mechanical access control systems, offer a secure solution to ensuring that unauthorised access cannot be gained to your premises, or restricted areas within your premises.

- Optional key override
- Deadlocking cylinder latch
- Programmed at keypad without removing from door
- Suitable for internal/ external use
- Access by single code

Manual Door Locks

Associated Security carry a broad range of door locks for all kinds of home security and business security needs. Our range of high-security manual door locks are designed to combat the growing threat of unauthorised entry. Ensuring that your manual door lock systems are in keeping with the required level of security for your premises, in addition to ensuring that these are professionally installed by our expert team of in-house lock engineers, will provide peace of mind that your premises is sufficiently secured against unauthorised personnel.

- Anti-jimmy hookbolt design, locking the door into the frame
- Deadlock latch feature, providing unique two point locking
- Recommended by insurance companies and the police
- Key operation from both sides of the door
- Master keyable with other detainer locks

PAXTON 10

The Paxton 10 system combines next generation Access Control with Video Management on one user-friendly, online interface, allowing you to manage the security of your premises with ease.

This system allows for complete control over access to your entire premises, whilst simultaneously being able to view and record video footage of what happens on site. The Access Control side of the system provides the ability for you to decide who has access to your building, and when, ensuring that unauthorised access cannot be gained.

All doors on the system will lock automatically and will only open when an authorised access token is presented. Should a forced entry attempt be made, the surveillance cameras will capture the event and alert the system administrator.

Opting for the use of Paxton 10 within your building provides a truly simplified site management and security solution. Providing all of the benefits that complicated integrated systems offer, Paxton 10 makes it easy to build a complete solution. With access, video and integrated building management from one user-friendly, online interface. Paxton 10 future proofs your site's security with ultimate simplicity built in.

One server for the Paxton 10 can support up to 1000 doors across multiple sites, and it supports both camera and door management from a single controller, making this a not only a highly cost-effective solution, but an extremely simple and easy to navigate system as well. With zero configuration required for the Paxton 10 camera, server and controllers, this makes for a highly efficient installation - which is carried out by our fully trained and qualified in-house team.

The Paxton 10 system can be integrated with existing systems such as Z-Wave home automation and BACnet for Automation and control networks.

The Paxton 10 System includes:

- Complete door entry solution
- Wireless door handles
- Integrated user-friendly Apps
- Security cameras
- Door & video controllers
- Desktop readers
- Keypad readers
- Slimline access readers
- VR readers

Flexi Keypad

The Associated Flexi Keypad is the latest in our extensive Access Control range, designed with a security privacy filter to prevent those around you from viewing the access code when in-putted.

The privacy filter is not, however, the only access prevention technique – the Flexi Keypad has a feature built in to scramble up the numbers so movements when entering the code cannot be replicated if overseen, and any fingerprints left on the screen after access cannot give the code away either. There are a range of Keypad Displays available with the Flexi Keypad, allowing users to tailor their Access Control Solution to fit their specific needs.

- Full colour 5" display
- Security Privacy filter
- Capacitive touch sense
- Simple intuitive interface
- Optional Alphanumeric Access Code feature

Interlocking Door System

Interlocking door systems work through electronic access control locking systems connected to each door. The control electronics generate a signal to indicate when a door is closed and secure, which would allow the access to the next door in the sequence of interlocking doors within your premises. Each controller is also fitted with a control input that will prevent the releasing of the locking device. Through cross-connecting these control signals, the door controllers communicate the door status and only open one door at any given time.

This two or more-door system works by ensuring that if one door is open or unlocked, the remaining doors remain locked and refuse access.

- Electronic access control locking systems connected to each door
- Control electronics generates a control signal to indicate when the door is closed and secure
- Each controller has a control input that will prevent the releasing of the locking device

ATM SOLUTIONS

We ensure that our clients are offered a highly comprehensive security solution to meet their requirements through our range of ATM Solutions, and that means providing solutions for safeguarding both your assets and cash. Cash machines provide an attractive target to thieves, and as such they can be particularly vulnerable to attack. Not only that, but members of staff and CIT companies replenishing ATM's also be at risk. Our ATM Solutions range includes ATM pods, plinths, chains, locking bars & gas suppression units.

Vulcan Telescopic ATM Pods

Our Vulcan Telescopic ATM Pods have been designed to provide a secure solution for high-risk areas with restricted space available. Manufactured from heavy duty solid steel with a certified infill to offer a high level of attack resistance, our Telescopic ATM Pods provide an added layer of security for both the ATM and for CIT staff during deliveries.

The telescopic enclosure is secured by high level security locks and has been designed for both front or rear loading ATM's. The access door can be mounted on either side of the enclosure, allowing our customers to tailor their ATM Security solution to meet their own requirements, both for optimising spatial capacities, and for ease of access for staff.

- Manufactured from heavy duty steel with a certified infill
- Ideal for high-risk areas
- Designed for front or rear loading ATM's
- Offers a high level of attack resistance

Static ATM Pods

Our Static ATM Pods are certified to LPS 1175 (Issue 7) standards, and are available in security ratings SR3 to SR6, providing exceptional levels of protection for ATM's.

These Static ATM Enclosures have been designed for single or multi ATM installations with the choice of fitting single doors, double doors or twin door security "air lock" options for access. Not only do we offer multiple access solutions, but our Static ATM Pods can be fitted with single or multi point locking systems to the doors, in addition to offering electro mechanical access control.

- Certified to LPS 1175 (Issue 7), Security ratings from SR3 to SR6
- Designed for single or multi ATM installations
- Single or multi point locking systems
- Installed in existing room or as a stand-alone structure

ATM Plinths

Our height-adjustable ATM plinth suits all ATM types and can be installed quickly and easily to even the most uneven of floors.

Plinths can be relocated and re-used making them an extremely cost-effective choice. Each plinth comes complete with a fixing kit with ground anchors which are installed by our expert engineers to provide the highest levels of security.

- Heavy duty design
- Ram resist technology
- Suits all ATM types, floor types and conditions
- Can be re-used after an attack
- Can be re-used if the ATM is relocated
- Height range of 25mm to 580mm from floor level

ATM Chains

Our ATM Chains provide a secure solution for fixing your ATM to the ground, offering the optimal protection against forced removal. With three options available to choose from offering a secure fixing solution with one chain, two chains of equal length or two of unequal lengths, you can ensure that the appropriate fixing method is utilised for your premises.

The heavy-duty steel floor fixing plates provide security assurance against forced removal attempts. Our single chain option secures the ATM safe through internal fitting, whereas the dual chain options are fitted externally.

- Options include single chain, twin chains or unequal lengths
- Fixed with heavy duty steel door plates
- Retro-fitting available for all options
- External fitting applied for twin chains or single chain fitted through the base of ATM safe & secured internally

Locking Bars

Our sophisticated interlocking bars ensure that no more than one door can ever be opened at the same time whilst replenishing the ATM.

These locking bars are the only product like this on the market that are certified to LPC1175 level 3. Inner locking bars are comprised of a set of four interlocking doors connected by a sophisticated electronic locking system that ensures that no more than one door- accessing one of four cash cassettes - can ever be open at the same time. Once closed, no door can be reopened until a pre-set time has elapsed.

- Comprised of a set of four interlocking doors
- Only one door can be opened at a time
- Set time elapse must occur before door can be reopened

CASH MANAGEMENT SOLUTIONS

Working with a number of industry sectors who hold a wide variety of cash management needs, we know that cash management isn't a one size fits all solution. We've listened to our clients within retail, gaming, hospitality and banking industries and have developed a portfolio of cash management products suitable for any size of requirement.

Rotary Cash Transfer Unit

The Rotary Cash Transfer Unit is a compact system designed for the movement of bulk cash or valuables between secure and non-secure areas within buildings. With a simple single level operation and a convenient load height, it is extremely user friendly for individuals in both the secure and non-secure areas.

The Rotary Cash Transfer Unit provides a high level of communication, with its identification window and an electronic speech transfer unit, which includes a call button, operators mute button, and DDS approved induction loop.

The hatch is opened and closed by a controller in the secure area via a single level. During this process, a constant ballistic overlap ensures the secure side is protected at all times. We can also offer a Rotary Cash Transfer Unit solution for external use, constructed from weatherproof materials.

- Single level operation with park lock
- Electronic speech transfer
- Constant ballistic overlap
- Fits standard internal walls

Coin Trolleys

Our range of coin trolleys provide a secure and efficient system for the transportation of cash and coins with a choice of sizes and functions to suit individual business security needs.

As well as our standard range, we also manufacture custom trolleys to specification to provide our clients with a bespoke security solution to meet their exact specifications.

- Load capacity between 800kg-1700kg
- Easy transport of trolley in and out of lifts & vaults
- Dual control
- One dead lock & one snap lock or two dead locks

Bulk Transfer Units & Vision Panels

Our high-security Bulk Transfer Units can be installed through counters and external and internal walls, at any convenient height for the secure transfer of valued goods.

Designed with an electronic interlock which makes it impossible to open both doors at the same time, creating an easily controlled security air lock and ensuring the transfer of bulk cash and valued goods is secure.

Perfect for medium - high security risks where space will not allow for a traditional airlock.

For a complete solution, we also offer vision panels that work perfectly in conjunction with our bulk transfer units, allowing secure identification, communication and transfer of goods, ensuring staff and customer protection at all times. Our transfer solutions come with ballistic attack resistance in accordance with G1 and G2, and BSEN 1522: 1999.

Electronic Bulk Transfer Unit

- Approved for newer, larger CIT boxes
- Recommended for medium - high risk environments
- Optional slide out shelf available

Vision Panels

- Secure vision through walls and doors
- Audio options available
- Bullet resistant to G2/S86
- Extensively tried and tested

Till Units

Our range of Till Drawer units are constructed from robust steel and are fitted with between 2 and 4 lockable drawers with inserts and 1 lockable bottom cupboard.

With the option for both lockable and time delay cupboards, our range of Till Units ensure that unauthorised access to business assets can be prevented and restricted only to those with the proper authority.

- Constructed from Robust steel
- 2-4 lockable drawers
- Drawers fitted with inserts
- 1 lockable bottom cupboard

Flip Lid Skimmer

Security at the point of sale is becoming increasingly vital to all retailers. At Associated Security, we have recognised this additional security requirement in various sectors and have developed the Flip Lid Skimmer, which ensures that both checkout staff and cash are protected.

- Robust steel construction
- Drawer status micro switch
- Heavy duty latching mechanism
- Unique 'skimming' note compartment

4 Point Cash Drawer

The 4 Point cash drawer has been designed for the storage of bank notes, coin & documents during working hours, suitable for a wide range of commercial premises for the secure storage of cash and documents within various premises.

Each security drawer is locked to the body by a locking bolt placed at the near inner side of the body and codes and time delay settings for each drawer can be easily programmed via the keyboard. Only one drawer can be opened at any time & each drawer has a separate time delay function.

- Easy programming of time delay locking
- Only one drawer can open at a time
- Each drawer is locked to the body of the cabinet
- Adjustable height

Counter Cache

Our counter cache solutions increase security at the POS by reducing the risk of attempted till snatches. Through streamlining the cash handling process, the counter cache reduces or completely removes the need for time consuming skims. This secure cash depositing system has been specially designed to store notes securely, whilst simultaneously presenting deposited notes in an organised manner.

- Storage of up to 600 notes
- Streamlined cash handling
- Design prevents unauthorised removal of notes
- Reduces requirement for skims and till downtime

Cash Counting Machines

Our state-of-the-art cash counter provides a simple, fast and accurate way to automate counting of notes and coins. The cash counter is highly accurate and eliminates human error, saving you time.

- Counts a cash drawer in less than 60 seconds
- Eliminates human error, and the need for double-checking
- Dual currency & language (14 currencies & 12 languages)
- Provides a simple, fast and accurate way to automate counting of notes and coins

Note Counter

Our range of Note Counting machines covers a wide range of retail requirements. With options for smaller business requirements, up to large commercial needs, the Associated Note Counters offer the ideal solution for your intelligent cash handling needs.

- Counting speed: 600, 1200 or 1500 notes per minute (selectable)
- Display type: LCD 3 digit batch display 4 digit count display
- Document size limits: 1.97" x 3.35" to 4.33" x 7.28"
- Hopper capacity: 300 circulated notes
- Stacker capacity: 500 circulated notes

Coin Sorter

At Associated Security, we not only supply this state-of-the-art Coin Sorter, we offer a vast array of intelligent coin sorting machines, with varying counting speeds, capacities and additional features to suit all our clients' requirements.

- Mains operated with an LED display
- Automatic sterling coin sorter and counter
- Counting speed: 450 coins per min
- Receiving slot capacity: 300 coins
- Batching variables 1-999

Electronic Banknote Detector

The Electronic Banknote Forgery Detector is a small, compact and reliable forgery detection unit with a large, easy to read LCD display. The unit will automatically count the denomination and value of the notes as they pass through the sensor. If any notes are found to be counterfeited, the unit will emit an audible alarm.

- Banknotes can be presented in any direction
- Detection speed of <0.5 seconds per note
- Lithium battery or mains power
- 2D size detection
- Ultraviolet detection
- Magnetic ink detection
- Metal thread detection
- Infrared accurate detection

Counterfeit Banknote Detector

Our forgery detection range includes both manual and automatic counterfeit banknote detectors, detector pens and UV detectors to name a few. The Counterfeit Banknote Detector allows you to detect forged notes by using its powerful 9W UV lamp for UV detection of banknote security features.

- UV detection
- Portable with keyring attachment
- 100% Accurate
- Instant result
- Notes / credit cards / driving licence / passports

standalone unit)

CASH RECYCLER

This intelligent cash recycler offers an unrivalled note detection solution & protection against fraudulent notes. Designed to speed up transaction time and operator profitability, allowing for a reduction in back-office time required by staff, the Cash Recycler has exceptional note handling capabilities and is highly reliable, with a 99%+ first time acceptance of new and street grade notes for an efficient and streamlined cash counting process. Our Cash Recycler solution is regarded as the best in its class largely due to the efficiency of its performance in addition to the robust design and easy-to-use functions.

(Above: the full
built-in unit)

- Up to 2000 notes storage
- Full spectral imaging sensors validate the authenticity of notes
- 100 note capacity bunch feeder
- Acceptance speed <2 seconds
- Constant refill available
- Separate reject tray
- Cost efficient refill
- 2 seconds note to note processing time
- 4 way barcode acceptance
- Unique barcode on each cash-bag for full audit traceability
- Recycler holds up to 70 notes 'true' mixed denomination and can store all denominations from a given currency
- Internal memory for data logging and SD card for simple updates

With its highly regarded reputation, the Cash Recycler works to help future proof your investment, eliminate shrinkage and accounting errors, maximise cash efficiency and lower operational costs, to provide a completely comprehensive Cash Management solution.

PERIMETER SECURITY

Our extensive range of Perimeter Security Solutions includes Security Glazing, Window Bars, Bollards, and Shutters which work as the ideal protection against unauthorised access to your premises. With expert installation by our in-house team of engineers, you can rest assured that the perimeter of your premises is sufficiently secured through not only the high-security solutions we can supply, but also through the professional installation process.

Security Window Bars

Security Window Bars offer a simple yet effective security solution and can be utilised for many applications, including both Domestic and Commercial premises. Due to the ability to manufacture these to multiple security standards, certified by the LPCB to LPS 1175: Issue 7 SR2, SR3 and SR4, these Window Bars offer a high-security solution for a vast array of premises, ensuring a range of security needs can be met.

Our Window Bars can be installed either internally or externally to your premises, allowing for all of our clients to achieve a secure solution against possible attacks or threats.

With expert installation carried out by our in-house team of engineers, we can provide assurance that fitting is carried out with the utmost efficiency, professionalism and expertise.

Security Glazing

Our Security Glazing is an effective anti-attack system with a track record of preventing potential attacks on a number of premises, including those within the Banking Industry. Expertly designed for existing windows, our Security Glazing can be readily tailored to fit virtually all applications and are certified by the LPCB to LPS 1175: Issue 7 SR2, SR3 and SR4 to provide the ideal solution for a range of security requirements.

Our security glazing is designed to be secure against many forms of attack and affords high-security protection from flying glass, bricks, and other types of intrusion like chemical sprays.

We offer two different options for your Security Glazing needs, either clear or obscure. Opting for clear glazing is ideal in circumstances such as public facing/high-street facing windows, and obscure glazing is ideal for areas which require more privacy.

LPS Approved Security Shutters

Where higher levels of security are the main concern, our LPS1175 approved Security Shutter resists attempts at forced entry from SR1 right up to SR4 to combat the most determined perpetrator.

Our High Security Shutters are individually designed and manufactured to suit the specific opening using stylish laths, which are much more attractive than conventional sections.

A wide variety of curtains and guide sections are available which are dependent on the level of security rating required.

With the option to have either manual or electronic functioning Security Shutters, we can provide the ideal solution for your individual security needs, ensuring that you receive a secure solution that perfectly matches the required functionality of your premises.

BOLLARDS

Security bollards create both a physical and visual deterrent, providing segregation and anti-ram solutions for a vast array of commercial premises.

Our Security bollards are available with a variety of fixings, designs and finishes to suit both the environment and use. These fixing types include removable and fold down to allow temporary vehicle access when required, ensuring we can provide an ideal solution for all of our clients' needs.

Removable Bollards

Removable Bollards or Security Posts offer an ideal solution for use on driveways and forecourts. With their highly visible yellow powder coated finish, and their 3mm thick hollow steel construction, we can provide assurance that these Bollards provide a robust solution that clearly stands out day or night.

Fold-down Bollards

Our high-security Fold Down Bollards offer an ideal solution for premises who require the repeated removal of the post, this fold-down Bollard collapses to 90mm when not in use, to allow full use of the surrounding area whenever necessary.

SERVICES

We offer our professional security services 24 hours a day, 7 days a week throughout the entirety of the UK for our clients, ensuring that security requirements are fulfilled with efficiency and expertise. We use our own fully trained Master locksmiths, and expert access control and safe engineers. We are proud to have one of the highest first-time fix rates in the industry and we continuously surpass our set service level agreement targets.

PROJECT & ACCOUNT MANAGEMENT

To ensure the highest levels of client satisfaction, dedicated account managers will work from start to finish on a project to make sure the end product is the perfect solution for you. Associated Security currently manage roll-out projects for a number of our clients including retail and leisure industries and major high street banks.

This work includes liaising with our clients and being relied upon to deliver on or before schedule. We have dedicated account managers who learn about our clients, their business and the security expectations of each, this enables us to give specialist advice that is individual to them.

"As a financial institution, we take the security of our colleagues and assets very seriously. As such, we require reliable suppliers who can deliver to a high standard. Associated have been our preferred supplier for many years in respect of safe and lock maintenance, as they are able to deliver a professional service, from the minute we raise a job with the Help Desk, to the expertise of the engineers attending our sites. Not only do they deliver an excellent service on reactive call outs, they have also been involved in numerous capital projects, which they have delivered with the same level of expertise."

Jane P | Senior Security Manager | Banking Industry

SERVICE CONTRACTS

We offer expert service contracts to both our domestic and commercial customers, tailored to meet their individual security requirements. Our contracts can cover either new or existing safes and vaults, Access Control Solutions and also cover all call-outs and materials up to a certain cost (dependant on the selected package), in addition to a planned preventative maintenance visit on a yearly basis.

Packages can be purchased and renewed on an annual basis, or every 3 or 5 years, dependent on your preferred length of service and guaranteed protection.

"We have worked in partnership with Associated Security for many years. In this time I have found them to be experts in their field, extremely reliable with the ability to work to tight deadlines. I wouldn't hesitate in recommending them to any company who requires safe or locksmith services."

John W | Head of Profit Protection | Retail Industry

"Associated Security are brilliant, fast, efficient and provide great customer service. They respond quickly to requests for jobs and make sure the work is done to a good standard. If there are any issues these are resolved quickly and without any disruption. They understand the urgency to get jobs done quickly and are competitively priced."

Retail Risk Team | Gaming Industry

MANUFACTURING

In 2013, Associated Security acquired our own UK Manufacturing facility through the SMP Security. As one of the last few remaining British Safe manufacturers, SMP uses a combination of traditional methods and modern machinery to construct their exceptional range of secure storage solutions. With over 45 years of experience in the manufacture of Safes and secure storage solutions, we can provide assurance that customers who purchase SMP manufactured safes receive the highest quality solution.

Through their in-house industrial design team, expert safe engineers and manufacturing team members, SMP Security are able to offer reduced lead times to provide the ideal solution for our customers, without any delay caused by overseas shipping. With a 5-year warranty offered on all of their high-security safes, this reaffirms how certain we are of the quality of these UK Manufactured products.

INVESTING IN INNOVATION

Since SMP joined the Associated Security Solutions Group there has been a large investment which has mainly focused around new machinery, such as CNC machinery which can be digitally programmed to bend, cut, drill and tap the metal automatically.

INCREASING OUTPUT AND QUALITY

This investment in high quality equipment reduces the manufacturing time, therefore increasing output but without compromising on the quality techniques which we've used for the past 40+ years to create the high-security solutions we provide to domestic & commercial clients.

STANDARD AND BESPOKE

Although SMP Security are well respected for their production of Cash Safes to Grade 6 specification, they also manufacture cabinets and strong room doors as well as having the capability to produce any bespoke requirements you may have. All safes produced by SMP Security are designed to meet and exceed the requirements of the European Safe testing as outlined in LPS 1183 Issue 4, as well as the European standard for safes EN1143-1:2005, tested and certified by the LPCB and manufactured under the control of ISO 9001. With the addition of SMP Security it now gives Associated Security the ability to self-deliver to all clients without the need to use any third parties which means we maintain full control of your projects.

DELIVERY & INSTALLATION

We understand that when carrying out work on site, security and confidentiality is of the highest importance. At Associated Security, we take this very seriously and ensure that all of our engineers have full DBS certifications and staff vetting to BS 7858. We have our own in-house delivery teams operating across the UK from our nationwide depots, so our safe installation services cover the whole of the UK. We use our own fleet of vehicles for our deliveries, with standard vans and even lorries with Hiab Cranes fitted, in addition to unmarked vehicles where required.

All our delivery teams have years of combined experience in the delivery and installation of safes and security products, giving you total peace of mind, knowing that your products have been handled and installed to the correct standards. We can also offer post-installation support and guidance through our live 24/7 helpdesk and our network of safe engineers and locksmiths across the UK.

SERVICE & MAINTENANCE

Associated Security has a team of multi-skilled locksmith, access control, and safe engineers who cover the whole of the UK and are available 24/7. All our lock and safe engineers are active members of The Master Locksmith Association (MLA) and undergo training and annual assessment.

We can offer expert engineer assistance in as little as one-hour within city-centre locations, ensuring our customers receive urgent attendance when it's needed most, and with a first-time fix rate of over 96%, our customers can rest assured that our engineers and our fleet of vehicles are fully equipped and prepared to provide the required assistance.

RELOCATION & REMOVAL

Associated Security Solutions specialise in safe removals, disposals and relocations. All work is carried out by our own fully qualified and highly experienced safe engineers who are available 24 hours a day, 7 days a week all around mainland UK.

ANY SHAPE OR SIZE

Our safe removal vehicles are fitted with the latest Hiab cranes and tail lifts to ensure a stress-free and safe removal service; regardless of shape, size or location within the premises as we can also offer this service for basement or upper floor removals. We can also provide our relocations & removals in our unmarked vehicles for a discrete service.

DBS CERTIFIED ENGINEERS

We have a crew of over 60 expert safe engineers based throughout the UK & Ireland, all of which have full DBS certification and undergo staff vetting to BS 7858, providing assurance for our customers that their security and confidentiality is of the highest importance when carrying out work on site.

SAFE AND SECURE RELOCATION

If you're moving home or office and want to take your safe with you, we can provide a relocation service to securely transport your safe from the old location to the new location. We also offer the ability to store your removed safe with us in our nationwide warehouses until it's time to relocate.
