

ASSEC CS218 COIN SORTER

The AsSec CS218 Coin Sorter is a medium-cost automatic coin sorter and counting machine designed for handling medium volumes of UK Sterling coins. It is also available for Euro coins. This device is mains operated and features an LED display that shows the total value counted and the values for each denomination.

How It Works

The AsSec CS218 Coin Sorter is designed to streamline the coin counting and sorting process. It counts and sorts mixed denomination coins, making it an ideal solution for businesses handling medium volumes of cash. The machine operates smoothly with a high counting speed and can be set to batch coins in quantities ranging from 1 to 999.

Key Features

- Metal Sorting Disc: Comes as standard for enhanced durability and efficiency.
- Automatic Operation: Easy-to-use with minimal manual intervention.
- LED Display: Clearly shows the total value and individual denominations counted.
